

Discover how Holiday Inn Express  
are making big energy savings  
with the use of solar energy

## Holiday Inn Express, Nuneaton

“It is rare to find such an efficient, client focused company that actually deliver 100% on what they say they will do. Not only that, but the care and attention of their personnel was first class. I have no hesitation in recommending their organisation whatsoever.”

Gavin Elliott, Managing Director. Alder Hospitality Management.

### System specification

Size of system: 50 kWp

Solar Panels: 192 Jinko 260 W

Annual Electricity Generation: 49,650 kWh

In partnership with

# Helping hotels utilise all the benefits of solar energy to reduce electricity costs. For Free.

At Energy Saving Solar we have teamed up with REI to offer hotels the option of fully funded electricity generating solar PV systems.

With REI's experience of installing over 1,000 'Free' and 'Combined' options there's no maintenance or insurance to worry about at any stage of the contract.

## Innovative funding schemes

REI provides 2 funding options - 'Free' and 'Combined'. There is a further Capital Purchase Option should you wish to fund the project yourselves. So you have the choice of which option most suits your individual needs.

Funding option	Free	Combined	Capital Purchase
Capital investment	Zero	Typically 25% of the total capital cost	100% of the total capital cost
Solar PV electricity	Typically 50% of your current grid tariff for 20 years; free thereafter	Free for the lifetime of the system	Free for the life of the system plus the Feed in Tariff and the Export Tariff.
Monitoring, maintenance & insurance	Undertaken free of charge for 20 years	Undertaken free of charge for 20 years	Undertaken by the owner
Return on Investment	n/a	c. 20% - 30%	c. 15% - 20%
